

Air treatment system with adsorption dryer, CO-, CO₂-, NOX- and SO₂ adsorber, pre-filter, final filter and condensate drain.

MEDICAL DRYERS

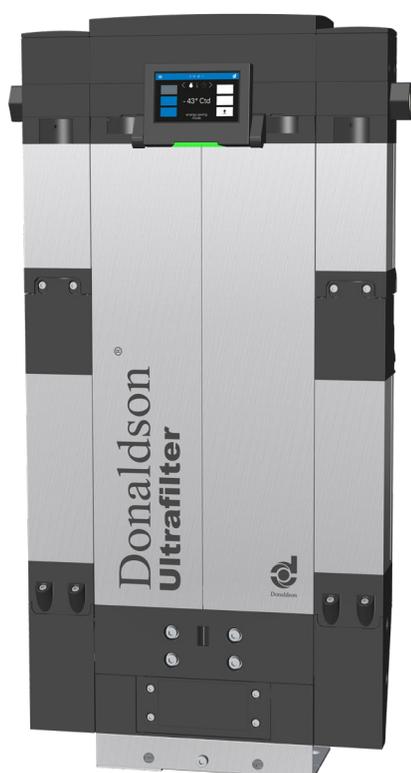

The MEDIPAC dryers based on the adsorption devices are used to ensure clean and dry compressed air in accordance with the suitable medical standards and requirements.

Ultrapure Smart Standard

- adsorbent in replaceable cartridges,
- compact design and small dimensions,
- replacement indicator of consumables, informing about optimum time for replacement of the dryer filtration elements and cartridges, ensuring safe operation of the device at the same time,
- unique integrated control block, ensuring comfortable maintenance.

Ultrapure Smart Superplus

- control dependent on load - operation cycle adapts automatically to the moisture load at the inlet, which affects the regenerated air saving and reduction of operating costs,
- possible intermittent operation - ensures compressed air saving,
- self-diagnosing system - full monitoring of the regenerated air flow parameters by the sensors.

Typ	Flow*	Regeneration consumption* (average)	Outlet flow rate* (minimum)	Power supply	Connection	Weight

Ultrapure Smart 0100	100	13,60	63,20	230/50/1	G 1	141

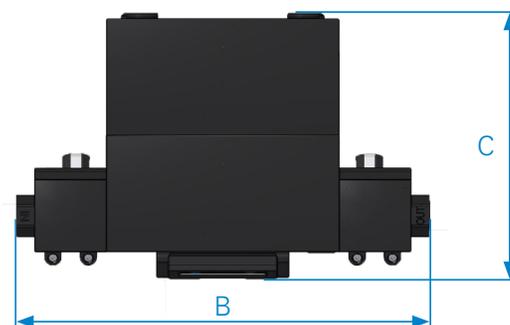

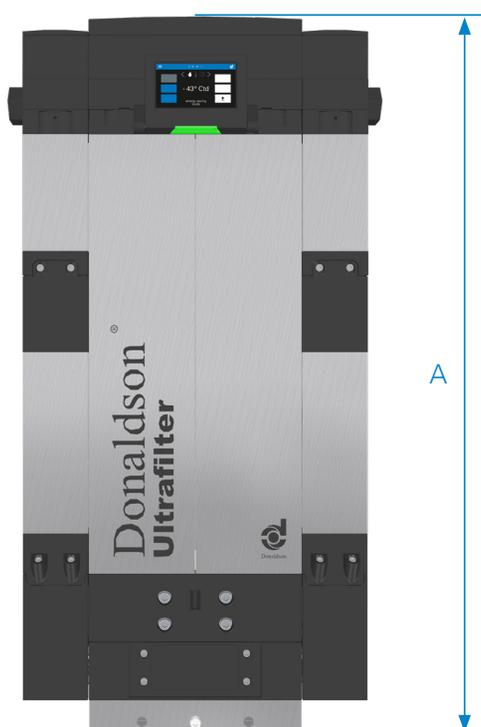

***Reference conditions:**

Operating pressure	7 bar
Compressed air temperature	35°C
Ambient temperature	20°C
Pressure dew point	-40°C +/- 1

Limit conditions:

Min/max operating pressure	4 bar/16 bar (0005 - 0025), 4 bar/12 bar (0035 - 0100)
Max compressed air temp. on the inlet	+50°C
Min/max ambient temperature	+4°C/+50°C
